All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to the amendment filed 10/14/2005.
2. ☒ The allowed claim(s) is/are 1, 3 and 5-22.
3. ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) ☒ All b) ☐ Some* c) ☐ None of the:
 1. ☐ Certified copies of the priority documents have been received.
 2. ☒ Certified copies of the priority documents have been received in Application No. 09/736,368.
 3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

* Certified copies not received: _____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.

THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

4. ☐ A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
 5. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.
 - (a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached

DETAILED ACTION

Response to Amendment

1. The reply filed 10/14/2005 was applied to the following effect: All relevant objections and rejections are withdrawn as being satisfied.

Reasons for Allowance

2. Claims 1, 3 and 5-22 are allowed.

The following is an examiner's statement of reasons for allowance:

This application is for a DISK DRIVE SYSTEM.

- **Claim 1** specifies a media cartridge, which requires:

"a unit to be detected for the position detection for detecting a position of said small-sized storage medium by position detection means provided on the side of said disk drive."

Yamamori '530 shows a media cartridge [141] formed to have the same shape as that of a disk storage medium mounted on a disk drive for accessing said disk storage medium, and comprising not less than one attachment unit [143] for holding a small-sized storage medium [126] so as to be accessible by access means provided at said disk drive [Figs. 1 and 10].

The prior art of record fails to fairly, teach, show or suggest, by either anticipating or rendering obvious, the invention as set forth in the claims of the instant application. Furthermore, a search made does not detect the combined claimed elements as set forth in the pending claims. Additionally, the reasons for allowance of the claims over the prior art of record is believed to be readily clear, self evident and apparent from the claim language set forth in claim 1, when compared and contrasted with the prior art.

More particularly, the instant invention (as set forth in claim 1) provides for a unit to be detected for the position detection for detecting a position of said small-sized storage medium by position detection means provided on the side of said disk drive. None of the cited prior art of record, however, do not disclose such a unit to be detected for the position detection for detecting a position of said small-sized storage medium by position detection means provided on the side of said disk drive, as set forth in the manner, function and relationship relative to other claimed structures as prescribed by the independent claims.

- **Claim 7** specifies a media cartridge formed to have the same shape as that of a disk storage medium, which requires:

“each said attachment unit being located at an equal position from the center of said cartridge, and said plurality of attachment units being four in number, each said attachment unit being located at every angle of 90 degrees relative to the center of said cartridge.”

The instant invention (as set forth in claim 7) provides for each said attachment unit being located at an equal position from the center of said cartridge, and said plurality of attachment units being four in number, each said attachment unit being located at every angle of 90 degrees relative to the center of said cartridge. None of the cited prior art of record, however, do not disclose such said attachment unit being located at an equal position from the center of said cartridge, and said plurality of attachment units being four in number, each said attachment unit being located at every angle of 90 degrees relative to the center of said cartridge as set forth in the manner, function and relationship relative to other claimed structures as prescribed by the independent claims.

- **Claim 10** specifies a media cartridge formed to have the same shape as that of a disk storage medium, which requires:

“comprising not less than one attachment unit for holding a small-sized storage medium so as to be accessible by access means provided at said disk drive, wherein, each said attachment unit includes an identification unit for indicating information which uniquely identifies each said attachment unit by identification means of said disk drive.”

The instant invention (as set forth in claim 10) provides for not less than one attachment unit for holding a small-sized storage medium so as to be accessible by access means provided at said disk drive, wherein, each said attachment unit includes an identification unit for indicating information which uniquely identifies each said attachment unit by identification means of said disk drive. None of the cited prior art of record, however, do not disclose not less than one attachment unit for holding a small-sized storage medium so as to be accessible by access means provided at said disk drive, wherein, each said attachment unit includes an identification unit for indicating information which uniquely identifies each said attachment unit by identification means of said disk drive as set forth in the manner, function and relationship relative to other claimed structures as prescribed by the independent claims.

- **Claim 22** specifies a media cartridge formed to have the same shape as that of a disk storage medium, which requires:

“comprising not less than one attachment unit for holding a small-sized storage medium so as to be accessible by access means provided at said disk drive, wherein, said small-sized storage medium is a smart media.”

The instant invention (as set forth in claim 22) provides for not less than one attachment unit for holding a small-sized storage medium so as to be accessible by access means provided at said disk drive, wherein, said small-sized storage medium is a smart media. None of the cited prior art of record, however, do not disclose not less than one attachment unit for holding a small-sized storage medium so as to be accessible by access means provided at said disk drive, wherein, said small-sized storage medium is a smart media as set forth in the manner, function and relationship relative to other claimed structures as prescribed by the independent claims.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher R. Magee whose telephone number is (571) 272-7592. The examiner can normally be reached on M-F, 8: 00 am-5: 30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William Korzuch can be reached on (571) 272-7589. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
